Projects

Elite Web Services | GitHub | Heroku   **April 2022**
Functioning ecommerce mockup site deployed on Heroku, where users can purchase web services.
- • A collaboration with fellow FullStack Academy students, where my focus was the site's products.
- • Built out products in PostgreSQL and rendered them in React.js/CSS using AJAX calls to retrieve data.
- • Pair programmed with team members on the more complex portions of the site, such as creating carts.

Fitness Tracker | GitHub | Heroku   **April 2022**
App that allows users to create an account and start making their own workout routines to get fit!
- • Pair programmed with a fellow classmate using Express.js and React.js.
- • This project primarily consisted of AJAX calls to an API and mapping components in React.js.

Retro Snake | GitHub | Heroku   **March 2022**
A throw-back to the timeless classic "Snake", with some added functionality.
- • This was a solo project made using CSS, React.js, Express.js, and PostgreSQL.
- • Users can customize game settings and add their highscore to a database for others to see on the site.
